ABOUT US

“Grinding our way since 1976 in the steel and marine industry”

Bitar for metal industry and marine service LLC was established in 1976 on shores of the red sea in AQABA-Jordan by AL_BITAR family group, we specialize in forming of quality engineered heavy steel structure works, Marine Aqua-Mechanical Engineering , construction of marine civil architectural structures and sales of costume mechanical parts, accessories, components and materials construction envelops. We also provide services in manufacturing, fabrication, maintenance and repair for marine architectural and mechanical structures, and offering our range of industrial solutions implementations and applications to on-shore/off-shore complex industrial challenges. Contributing primarily in engineering manufacturing and fabrication of steel alloys and traditional metal crafting , expertise in servicing private sectors, public sectors and number of global and regional organization in concerning marine activities in off/shore and on/shore buildings utilities and constructional facilities.

We have 40 years of experience and knowhow in production of heavy / light steel and alloy materials, engineering aqua-mechanical machines, and construction of terminal marine yard structures, and providing requirements and supplies. Pioneering in scale size projects and successfully operating in deferent work environments and conditions.

Our vision as a leading Jordanian company in the local marine and light industries services, that matured and successfully anchored Bitar’s benchmarks in a rapidly challenging , changing and demanding industry is to invest and seek new investment access for business continuity in various industrial segments And gaining future regional access to new developing industrial for benefits of our shareholders, stockholders, and investors , by continuously competing over quality of products and services.

تأسست شركة البيطار للصناعات المعدنية و الخدمات البحرية عام ١٩٧٦ في الاردن العقبة حيث تلعب دورا اساسيا في الصناعة و الصيانة و الاعمال المعدنية و المصانع و القطع البحرية حيث تمتلك الشركة خبرة واسعة في خدمة الشركات الحكومية و الخاصة وبكفاءة و جودة عالية

BITAR METAL TURNERY AND IRON MONOGERY INDUSTRIAL COMPLEX

GET IN TOUCH WITH US TODAY TO FIND OUT MORE ABOUT HOW YOU CAN TAKE ADVANTAGE OF OUR SERVICES

Service: sales retail and purchases

We can provide anything you find on dock

As a pioneer and one of the leading fabricators at the Jordanian heavy steels and alloys works industries , we have over the years founded a firm industrial foundation with a capability to perform industrial service schedules that fits the scale of our industry. Our site is designed to adopt any project size and prepared with all the necessary technological special and heavy equipment to operate on full capacity, and our qualified trained technician personals are able to form and fabricate all steels and alloys shapes and standards, welding with deferent welding technical standards according to local and international industrial measurements and quality criteria's. All Our fabricated parts go under a %100 dimensional and NDT/NDI certified testing's inspection before handling by our clients and customers. And additional testing's such as load testing and pressure hydro is available. Bringing precession and quality to our clients.

We offer all traditional steel and alloy process's such:

- 1.Laser precision cutting and all methods of material removal -rolling bending and shaping.
- 2.Casting large size steel and alloy forming and casting.
- 3.Welding, bolting and marine underwater structure sowings.
- 4.Oxy acetylene welding TIG-MEG-STICK –CO-2ARCH-AVC –SAW –GNAW and SMAW welding
- 5.Milling, boring, surface spin & turning surface grinding and CNC machining.
- 6.We offer our product finishing services.
- 7.Structures corrosion control , sandblasting and chemical stripping –acidizing stripping –anodizing coating –galvanizing coating steel – special thermal paints – marine paints –and custom and special gel coats and paints ,tooling, finishing and polishing .
- 8.We work with almost any steel or alloy in there deferent forms and shapes such as coil and sheet, rod and bar, tube and pipe or any custom form for any technical specs needs , and we obtain all necessary heavy and light machinery to proceed with any task required.

Stainless steel all grades

4/17-321-310-304ph-410-and 416

Aluminum all grades

-6063-6061-5052-3003-2024-214and 7075

Nickel all grades

-400-200K-625-601-600-500and 718

Carbon steels A36

Mild –low-medium –high-and ultra high carbon steel

Titanium, bronze, brace, phosphoric brace and special metallic and non metallic materials

OUR SERVICES

METAL AND STEEL FABRICATION WORKS, ARCHITECTURAL CONSTRUCTIONS. MAINTENANCE AND MODIFICATION OF MECHANICAL COMPONENTS

All our construction design blueprints and work is approved by the civil engineering standards communities. we specialize in work within the tidal zones and strong currents and on/shore remote location and we also have the ability to transfer skills and technologies to other arias inducing remote areas such as water ways and dams we have the ability to rebuild and reconstruct and repair of all steel and metal architectural structures our marine construction division primarily serves customers in the civil construction market including governmental municipal and privet sector needs. We have the ability to fabricate and construct and reconstruct any variety of mechanical and application or architectural structure for onshore or of shore, on demand of customers. We obtain support of all necessary heavy machinery and equipment filed machining and equipment installations to operate on demand.

OUR SERVICES

Structural works that we offer and more

- 1.Board walks
- 2.Boat hoists
- 3.Boat lifts
- 4.Boat ramps
- 5.Marine equipment
- 6.Buoys
- 7.Industrial equipment
- 8.Mechanical constructions
- 9.Commercials piers
- 10.Tanks
- 11.Container terminals
- 12.Ducts
- 13.Docks
- 14.All type of fabrication
- 15.Water way structures
- 16.Jackup barge
- 17.Hand rails
- 18.Pire piling and bucket heads
- 19.Cooling towers
- 20.Aluminum walkways
- 21.Machine guards
- 22.Machine gears
- 23.Reconditioning cylinder heads
- 24.Ship chandler
- 25.Pile jackets and wraps
- 26.Drinking water resources tank
- 27.Piping lines systems and support braces and repair

- 28.Ferry terminals
- 29.Floating docks
- 30.Harbor buildings
- 35.Industrial piers
- 36.Marine pipelines
- 37.Plat formers
- 38.Hydro electrical facilities
- 39.Outfalls and intakes
- 40.Sail, seals, guides ,shafts ,and linkage
- 41.Piping
- 42.Heat exchanges
- 43.Port structures
- 44.Waterway structures
- 45.Fuel tanks
- 46.Marine bucket heads
- 47.welded erection tanks
- 48.Stainless steel tanks
- 49.bulk grapples
- 50.Offshore layup of mobile units
- 51.Maintenance of cargo holdings
- 52.Bridge repair
- 53.Cathodic protection
- 54.Quayside repair works and flood protection works
- 55.Load conveyor belt

BITAR

PORTFOLIO

OUR SERVICES

OVERHALL AND MAINTENANCE OF MECHANICAL AND ELECTROMECHANICAL APPLICATION

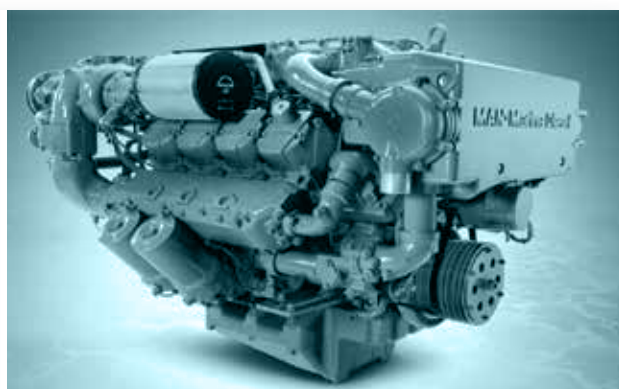

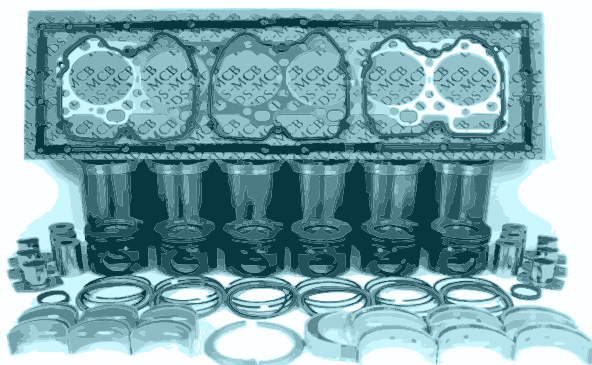

We repair revamp update and reconstruct a verity of mechanical and electro mechanical applications and system upgrades and new component installations.

We offer full service from simple electric repair to ground up system design and installations , of ac and dc systems, electronic navigational systems and components.

We offer a timely maintenance and repair service and routine maintenance service for mechanical and electrical system diagnostics and trouble shooting and updates in accordance to the highest industrial standards.

BITAR

P O R T F O L I O

OUR SERVICES

OVERHALL AND MAINTENANCE OF MECHANICAL AND ELECTROMECHANICAL APPLICATION

- 1.Repair and recovery of electromagnetic electrical motor coil windings
- 2.Marine two stroke diesel engines installation, modification and repair
3. Cylinder and valve reconfiguration.
- 4.Transmission gear system fabrication installation and repair
- 5.Marine propeller blades design modification, installation and repair
- 6.Outdrives, shafts, controls, gen sets and ac units modification insulation and repair
- 7.Body and frame of marine vehicles maintenance and repair
- 8.Wheel loader applications installation and repair
- 9.Thread repares recoil system

10.Fabrication, reconstruction and recovery of all internal and external gears and all types of mechanical gears - such: spur gears-rack and pinion –internal ring gears – helical gears –spiral gears –and double helical gears and more.

11.And we construct all type of jacks and repair of jack pumps for tilted frames and title frame jacks and lifting platforms , hydraulic supplied machines and all hydraulic machine applications such : beam jacks , cylinder, single action, telescopic, pneumatic jacks , AC and tie rod HE , hydraulic pressure oil and air jacks.

Service project management

All our construction design blueprints and work is approved by the civil engineering standards communities. we specialize in work within the tidal zones and strong currents and on/shore remote location and we also have the ability to transfer skills and technologies to other arias inducing remote areas such as water ways and dams we have the ability to rebuild and reconstruct and repair of all steel and metal architectural structures our marine construction division primarily serves customers in the civil construction market including governmental municipal and privet sector needs. We have the ability to fabricate and construct and reconstruct any variety of mechanical and application or architectural structure for onshore or of shore, on demand of customers. We obtain support of all necessary heavy machinery and equipment filed machining and equipment installations to operate on demand.

You will be surprised how easy we are to work with

Service mobile workstation, motoring maintenance vehicle

Our motoring maintenance mobile work station vehicle is fully prepared and designed from the ground up for industrial construction and prepare on location operations with all necessary equipment and a professional joyful team ready to service in any condition required reaching our clients and customers on the map

So if you're looking for a reliable and effective service reaching you where ever on the map our maintenance team of professional will be happy to carryout maintenance and fabrications, don't hesitate and give us a call now and our team will be on location to service you with a smile

We reach you where ever you need us on the map

Service: sales retail and purchases

We can provide anything you find on dock

We offer a wide range of options for our client's purchases and requirements and committed to bring the best products from global brands custom or technical applications. Special materials and alloy steel or metal raw materials, mechanical and electrical components at a competitive price without compromising the quality of products and at an abundant supply on demand, all of our installations are requested by projects from us because our customers know that we don't just purchase but also we get the insulation job right

1. Architectural construction material envelopes, metal and alloy raw material envelopes. Paints & resins, and special finishing materials.
 2. Shipyard management supplies.
 3. Mechanical chemical additives and lubricants
 4. Engine kits, auxiliary and diesel engines, turbo chargers, cylinder lines, pistons and piston crowns, caskets, thermometers and alternators, filter & cooling units and power supply systems,
 5. Electrical and navigational logistic marine communication equipment, control room system applications and indicators system components.
 6. Radio and satellite, GYRO compass, auto pilots -VHF - GMELSS and voyage date recorders and electrical installation accessories such as marine grade wire cables.
- We provide all custom accessories and ship requirements

Service leasing machinery equipment and expertise, field machining and installation service

We are your trusted source for cost and efficient constructional heavy equipment, and we ensure to you utmost quality and reliability from our equipment

1. Leasing heavy machinery and equipment for constructional earth foundation and concrete constructional
2. Earth moving and pile driving equipment and vehicles
3. Earth compressing equipment and vehicles
4. Hoisting equipment and vehicles
5. Conveying equipment
6. Aggregate product equipment
7. Concrete construction equipment and vehicles

BUSINESS ADVANTAGES

Delivery of client's requirements in value and quality within schedule is on our primary business objectives. We bring the best to you at the right time.

Providing our customers and clients with regular follow-ups over requirements if demanded by client for manufactured fabricates and service orders, we insure that your needs are going according to your requirements.

We offer common understanding and disclosures for report, publish and policies over customer requirements if the nature of project demands. We insure and respect privacy for your requirements and needs.

Highly skilled and trained technicians utilized to manufacture and fabricate Orders and projects with higher precision accuracy and quality. The best knowhow at your project.

Offering over the market competitive price quotes for scale and size projects. You never get our prices anywhere else.

We can employ and procure our manufacturing and production capabilities of our capacity production lines for customer requirements and prioritizing the project needs. Our factory is at your service.

We have the ability to mobile operations on the map in remote locations upon clients needs. You need us? Well be right at where you want us.

Our complete range of resources and supplier channels are ready to take and deliver our clients purchase orders with speed and quality, shopping with us is a convenient and rich experience.

We offer complementary free of charge delivery to our clients service orders and purchases orders on the local and regional shipping map. We ship your needs where ever on the map wrapped without smiles for free.

We obtain a range of production certificates and a spectrum of organizational communication channels for industry updates over technical specifications and standards such as the civil and Structural engineering communities and global industrial commits and standards communities. We want the best for you and us.

We have the ability to update and provide equipment machinery and expertise for customers for their project demands. We can get in details in our machines.

We have the ability to build, fabricate manufacture repair and reconstruct update and modify all mechanical applications, spare parts and all steel metal structures from within our own site capabilities. Anything made from steel and metal is our plaything

We obtain all necessary technology, machinery, knowhow and trained skills to produce all type of deferent steel and metal fabricates demanded by customer and industry. You get the best in the industry.

We perform pre delivery allocation of flows, regular and periodic testing and inspection methods for quality control measurements on services and fabricate manufactured or constructional products. No place for flows in your products

ACHIEVEMENTS

Our history in successful execution of projects and industrial local project programs alongside major local and regional Investors clients and stakeholders achieving a successful track and a portfolio history to be proud of.
